Back Cover

The Next Generation of Traditional Nymphs

The Nymph-Head™ Heavy Metal fly collection is built upon proven nymph patterns found in every angler's fly box. The vibrant bead colors offer irresistible fly color combinations. With the addition of “3D nymph eyes,” a more realistic insect profile is born from the fastest sinking tungsten beads on the planet.

Nymph-Head™ flies represent a more convincing imitation of aquatic trout food.

Truly Innovative Streamers with Unmatched Realism

The Fish-Skull™ fly collection offers fly fishermen an exciting alternative to streamer flies tied with dumbbells or cones. Innovative design and incredibly authentic materials have resulted in a compelling new range of modern flies.

Fish-Skull™ flies were designed and tested to be irresistible to a broad range of fresh and saltwater species.

Heavy Metal™ Pheasant Tail

The Pheasant Tail is one of the oldest of modern nymphs and is a fly that no trout fly fisher should ever be without. The Heavy Metal™ version takes this classic mayfly design to the next level with a fast-sinking tungsten bead and natural fly color options.

Hook Sizes: #12, #14, #16, #18, #20

Color variations: Brown, Black and Olive

Heavy Metal™ Pheasant Tail Flashback

Using the simple but deadly power of the Pheasant Tail, the Pheasant Tail Flashback nymph has the addition of a reflective thorax giving this fly a profound advantage on those days when the water can be a little cloudy or churned up. Producing results in even the most over fished stretches of water, it is literally a time tested design that is incredibly effective.

Hook Sizes: #14, #16, #18

Color variations: Brown, Black and Olive

Heavy Metal™ Hares Ear

The beadhead Hares Ear is recognized as one of the most widely fished and effective nymph patterns in the world. The “buggy” nature of this fly enables it to be fished throughout the year, as it represents a medley of aquatic prey. The Heavy Metal™ version is available in the 3 classic Hares Ear colors (natural, black and olive) with a matching color tungsten bead.

Hook Sizes: #12, #14, #16, #18, #20

Color variations: Natural, Black and Olive

Heavy Metal™ Hares Ear Flashback

One of the best nymph designs ever is coupled with a tungsten bead in natural fly colors to create a modern classic. Flashback nymphs offer just a bit more sparkle to get noticed in the water column.

Hook Sizes: #12, #14, #16

Color variations: Natural, Black and Olive

Heavy Metal™ Copper

Green

Blue

Brown

Red

This fly sinks quickly and can be used as a deep nymph or a dropper. Fish seem unable to resist the combination of color, flash, and realistic shape. It is best fished where mayflies or stoneflies are common and even works in certain lake situations.

The popular green, red and blue ultra-wire bodies are enhanced with matching color tungsten beads. For a toned-down, more natural looking fly try the brown variation that has a mayfly brown wire body and tungsten bead.

Hook Sizes: #12, #14, #16, #18

Heavy Metal™ Lightning Bug

A very effective nymph when you need a little extra flash to attract the trout.

The pearlescent mylar body combined with the unique blue or pink tungsten bead almost glows, even under water. This is the ultimate attractor nymph for deep runs, low light conditions, and dirty water.

Hook Sizes: #12, #14, #16, #18

Blue

Pink

Heavy Metal™ Prince

Green

Black

Fished on the bounce, the unassuming beadhead Prince nymph is a universal pattern that is especially effective in getting down deep to fish in fast flowing water.

The green variation matches a heavy green tungsten bead with peacock herl used in the fly's body construction and shimmers brightly when in the water. For a more natural look the black variation has a black tungsten bead with matching black split tail and wing giving the impression of a stonefly or mayfly nymph that has come free from the bottom.

Hook Sizes: #12, #14, #16

Black

Brown

Heavy Metal™ Stonefly

Designed with realism and movement in mind, the Heavy Metal™ Stonefly has wiggly rubber legs, buggy biot antennae and tails, and layered turkey feather wing cases for that perfect touch of underwater realism.

The large Heavy Metal™ tungsten bead head on this fly provides a bit of flash, a realistic profile and will allow an angler to get the fly right down in the fastest of water columns.

Hook Sizes: #6, #8, #10, #12

Brown

Olive

Heavy Metal™ Bird's Nest

The Heavy Metal™ Birds Nest is a versatile searching nymph that is very productive as an impressionistic mayfly nymph or caddis larvae imitation.

Hook Sizes: #12, #14, #16

Heavy Metal™ Caddis Larva

Green

Caddis Larva patterns are excellent searching patterns throughout much of spring and summer due to their tendency to sporadically hatch and also to drift downstream prior to hatching.

Brown

The Heavy Metal™ Caddis Larva is a fast sinking, plump caddis larva imitation available in brown, green and grey. Work the fly on the bottom in slower sections of the stream to imitate it crawling about. Optionally, try high-sticking this fly in pocket water and around rocks and submerged logs.

Grey

Hook Sizes: #14, #16, #18

Heavy Metal™ Caddis Pupa

Green

Brown

Grey

This is a great imitation of an emerging caddis pupa that you can fish with success all year long. It has both imitative and attractor qualities that help to make it an effective fly. It can be fished on any water with caddis activity, and it is also a productive still water fly.

The tungsten bead offers a more realistic profile and enables you to fish faster or deeper water more effectively.

Hook Sizes: #12, #14, #16

Nymph-Head™ Assortments in the Bins

Nymph-Head flies are also available packaged as 'Assortments in the Bins' with a This innovative packaging format gives the retailer the option to display a higher p customer with useful information to help in their purchasing decision.

Nymph-Head™ Assortments in the Bins provide:

- Increased Convenience
- Better Information
- Higher Priced Bin Space

Nymph-Head™ Guide's Choice Fly Assortment Selections:

- 1) Hare & Pheasant *
- 2) Heavy Metal Hare *
- 3) Heavy Metal Copper *
- 4) Caddis Larva & Pupa *
- 5) Lightning & Copper *
- 6) Pheasant & Flash *
- 7) Prince & Bird *
- 8) Zebra Midge **

* Tungsten Nymph-Head fly assortment packaged in attractive 5-Fly retail packaging

** Nymph-Head Firebug Zebra Midge assortment packaged in attractive 5-Fly retail packaging

Grey

Brown

Heavy Metal™ WD40

The Heavy Metal™ WD40 is a fantastic fly for imitating small BWO emergers and midge nymphs. The thin body makes for an unassuming pattern that doesn't raise the danger flag in the trout's mind.

Available in natural olive, grey, brown and black with a matching color Heavy Metal™ tungsten bead for effective fishing in deeper pools and faster riffles and runs.

Hook Sizes: #18, #20

Firebug Midge

This range of improved Zebra midges is available in six different natural and attractor color options and in two sizes, giving you choices for any fishing situation.

Beautifully tied using FlyColor™ brass beads, this simple little fish-catching pattern is the perfect fly for multi-nymph and dropper rigs and should have a home in every fly box.

Hook Sizes: #18, #20

Skulpin Bunny™

The Skulpin Bunny™ won the “BEST IN SHOW” Award for the Best New Freshwater Fly Pattern at the 2012 International Fly Tackle Dealer show in Reno, Nevada.

The Skulpin Bunny is an authentic sculpin pattern that looks and performs in a realistic, imitative manner. It combines the attributes of the award-winning Fish-Skull™ Sculpin Helmet with the irresistible natural movement of rabbit fur strips to produce a simple, high performance fly that is a real pleasure to fish with.

The fly is a very effective trout and smallmouth bass fly that can be comfortably fished with #5 or #6 weight fly rod.

6 colors:

- Grizzly
- Sand
- Olive
- Olive Yellow Belly
- Brown
- Crawdad

Hook Size: #4

Skulpin Buzzer™

The Skulpin Buzzer combines a Sculpin Helmet with the proven attributes of a Woolly Buzzer to produce a cross-over fly pattern that fish really struggle to resist!

Designed to be fished on the river bottom, the fly can be either dead-drifted or slowly stripped to imitate a sculpin. Rubber legs have been added to imitate the prominent pectoral fins found on sculpins and to add more action to the fly.

There are 3 basic color variations designed to suit different geographic areas and fishing conditions.

Colors: Brown, Olive, Black
Hook size: #6

Crafty Deceiver™

The Crafty Deceiver™ won the “BEST IN SHOW” Award for the best new saltwater fly pattern at the 2011 International Fly Tackle Dealer show in New Orleans, LA.

A general purpose streamer designed to imitate many of the smaller, often semi-translucent bait-fish found in both freshwater and saltwater fisheries. This simple, minimalistic fly combines the Fish-Skull™ with sparsely tied craft fur and flash materials to achieve a slim, realistic bait-fish profile that has great action.

Colors: White/Olive, White/Tan, White/Grey & White/Chartreuse.

Hook Size: #2

Super Buzzer™

Using a Fish-Skull™ instead of a traditional bead-head on a Woolly Buzzer creates a deadly effective fly that resembles many edible creatures in the water such as nymphs, leeches, hellgrammites and small sculpins.

Colors: Olive, Black & Brown

Hook Sizes: #8, #4

Forage Fly™

Black

White

Tan

Chartreuse

Hook Sizes: #1/0

Mike Smith's Forage Fly™ combines the unique features of the Fish-Skull™ head with natural body materials and a "frantic tail" to create an incredibly authentic bait-fish imitation that is as versatile as it is realistic. While originally designed to target river species such as trout and smallmouth bass, this pattern has proven itself equally effective at catching many other freshwater fish.

Saltwater Forage Fly™

Colors: White/Blue, White/Olive,
White/Grey and White/Pink

Hook Sizes: #1

The demand for the Forage Fly™ has led to the design of a saltwater version using a #1 stainless hook (tied hook up for shallow inshore situations) combined with a small-medium size Fish-Skull™ in a variety of saltwater colors.

This authentic and versatile baitfish pattern has proven effective for snook, false albacore, striped bass . . . and the list goes on!

River Creature™

Mike Smith's River Creature™ pattern mimics various freshwater crustacean and other food sources.

Colors: Black, Chartreuse & Brown

Hook Sizes: #1

Tied on a #1 hook, it provides a tempting crawfish, hellgrammite or sculpin imitation and proves irresistible to bass and other lake or river species.

Salt Creature™

Colors: Sand, Pearl & Brown

Hook Sizes: #4

The authenticity of the Fish-Skull™ is the secret to this deadly imposter which is tied “hook up” in both saltwater and freshwater varieties allowing it to glide along the bottom where “creatures” typically lurk.

The Salt Creature™ comes in a range of colors suited to flats fishing and has proven to be an effective fly for bonefish, redfish and other in-shore species.

Have we met? maybe we should...

Fishing Flies: \$6.60/dozen

Who is American Fly Outfitters, Inc?

My name is Dan Tilton, owner of American Fly Outfitters. We are a full-service premium quality fly production company servicing dealers, large outdoor retailers and distributors. The business was created in 1998 to provide increased value for fly fishing retailers on a complete range of over 650+ traditional fly patterns found within every fly shop's bins.

Our flies have been "field-tested" all over the world in some of the toughest fishing conditions imaginable. It is our philosophy to only tie with the best hooks, feathers and materials. This method of doing business allows us to deliver an outstanding product consistently.

American Fly Outfitters is the official manufacturing partner of Flymen Fishing Company producing the next generation Nymph-Head™ and Fish-Skull™ ranges of flies.
